1-32-5/1, Indra Nagar, Aruppukottai.

SKILLS

- JAVASCRIPT
- HTML, CSS, BOOTSTRAP
- REACTJS, NodeJS
- MongoDB

EDUCATION

BSC INFORMATION TECHNOLOGY

DEVANGA ARTS & SCIENCE COLLEGE

2019-2022

CGPA : 7.2%

CERTIFICATIONS

SHIASH INFO SOLUTIONS

2022

(Internship)

DECLARATION

I hereby declare that all the facts mentioned above are true to the best of my knowledge and belief and I hold the responsibility of their authenticity and correctness.

PROFILE

As a fresh MERN Stack developer, I bring a solid understanding of MongoDB, Express.js, React, and Node.js. Eager to contribute my skills, I'm focused on learning and creating efficient web applications. With a passion for clean code and user-centric design, I'm excited to collaborate and grow in a dynamic development environment. Through personal projects and education, I've gained practical experience in building web applications. With a keen eye for detail and a dedication to continuous learning, I'm eager to contribute my fresh perspective to development teams.

PROJECTS

TIC-TAC-TOE

REACT.JS

- It is a classic game that involves two players taking turns to mark spaces on a 3x3 grid. The goal is to be the first player to form a horizontal, vertical, or diagonal line with their respective marker, which is typically an "X" or an "O". In this case, we will be building a Tic-Tac-Toe game using the React JavaScript library.
- To implement the game logic, we'll define a series of React components. The main component will represent the entire game board and manage the state of the game. It will render a set of square components, which will be responsible for handling user clicks and displaying the current state of each square (empty, "X", or "O").
- Overall, building Tic-Tac-Toe using React allows us to create an interactive and dynamic game that updates in real-time as players make their moves.
- Deploy-URL: <https://tic-tac-toe-in-react-js.netlify.app/>

URL SHORTENING APPLICATION

REACT JS, NODE JS, MONGODB

- URL Shortening:** The application generates unique, compact URLs from user-submitted links.
- Custom Short Links:** Registered users can create personalized aliases for their short URLs.
- Deploy-Url: <https://app.netlify.com/sites/wondrous-praline-52f37d/overview>
